

Do you know if you are in compliance?

How much milk do you **THINK** you are purchasing?

100%      110%      120%      130%      140%      150%

Now, let's fill in the numbers!

*Use numbers from most recent month:*

\_\_\_\_\_ # of gallons purchased x 128 ounces = \_\_\_\_\_ ounces ÷ (serving size\*) =  
\_\_\_\_\_ # of servings ÷ # of meals served \_\_\_\_\_ = \_\_\_\_\_ x 100 = \_\_\_\_\_%

- If you are buying 100% or more, congratulations on a job well done!
- If you are right at 100%, consider buying 25 – 50% more milk each month to account for extra children and children requesting seconds.
- If you are below the required amount, take steps immediately to increase your milk purchases.

**\*Serving sizes=**

If your center serves a variety of ages, use 6 ounces.  
If your center serves mostly 0-2 year olds, use 4 ounces.  
If your center serves mostly 3-5 year olds, use 6 ounces.  
If your center serves mostly 6-12 year olds, use 8 ounces
